

Please leave my Xm satellite radio alone. I love satellite radio the way it is. The almost endless amounts of music stations, weather reports, and traffic reports are amazing. The most important reason to me that you should not change Xm at all is the fact that I pay for Satellite radio and I do not care what you want to change. You need to leave it alone. If I do not like something about it, I the paying customer will lobby Xm and try and have it changed. Free radio has already been tainted by the touch of the Fcc so please leave my Xm radio alone.
